PROFILE

Dedicated Full Stack Developer with 2 years of experience specializing in JavaScript, Vue.js, Node.js, and Express.js. Recognized as a top programmer, I was entrusted with developing a web application requested by our company president. I possess strong analytical skills and adaptability to solve complex problems. Passionate about programming and driven by the unlimited possibilities it offers, and I can express my creativity through innovative solutions.

WORK EXPERIENCE

Full Stack Developer

- House Research and Development Singapore Pte. Ltd. July 6, 2022 - Present
- Proficient in JavaScript, Vue.js, and Node.js, developing web applications with a focus on improving productivity, computation, and CRUD functionality.
 - Experienced with databases, including CouchDB, MSSQL, and MySQL, ensuring efficient data management and retrieval.
 - Approach UI and UX design by prioritizing user familiarity and incorporating best practices for intuitive web application interfaces.
 - Conduct thorough testing and debugging, using tools like Vitest to ensure accurate computations and functional web applications.
 - Integrated external APIs and services, including Google Sheets, Google Drive, and Japan Postal Address API, enhancing functionality and data integration.
 - Implement performance optimization techniques, such as lazy loading, efficient component usage, minimal libraries, and partial imports, for enhanced scalability.
 - Provide code reviews, guidance, and knowledge sharing to colleagues, supporting their growth and promoting good coding practices.
 - Experienced in troubleshooting and logical problem-solving, demonstrating analytical thinking in resolving coding challenges.
 - Conduct training sessions on JavaScript, Vue.js, and Node.js, acting as a trainer for colleagues and new team members.
